IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should always be followed, including the following:

**WARNING** - To reduce the risk of fire, electric shock, or injury:

1. Do not leave appliance when plugged in. Unplug from outlet when not in use and before servicing.
2. Do not use outdoors or on wet surfaces.
3. Do not allow to be used as a toy. Close attention is necessary when used near children.
4. Use only as described in this manual. Use only manufacturer's recommended attachments.
5. Do not use with damaged cord or plug. If appliance is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, return it to a service center.
6. Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run appliance over cord. Keep cord away from heated surfaces.
7. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
8. Do not handle plug or appliance with wet hands.
9. Do not put any object into openings. Do not use with any opening blocked: keep free of dust, lint, hair, and anything that may reduce air flow.
10. Keep hair, loose clothing, fingers, and all parts of body away from openings and moving parts.
11. Turn off all controls before unplugging.
12. Use extra care when cleaning on stairs.
13. Do not use to pick up flammable or combustible liquids such as gasoline or use in areas where they may be present.
14. This appliance is intended for household use only and not for commercial or industrial use.
15. Do not operate the vacuum if:
   - the power cord is damaged.
   - the hose shows visible signs of damage.
16. Do not use without vacuum bag and/or filters in place.
17. Do not unplug when rewinding the cord into cord reel. Do not allow plug to whip when rewinding.
18. The hose contains electrical wires. Do not use if damaged, cut or punctured. Avoid picking up sharp objects.
19. To reduce the risk of electric shock, this appliance has a polarized plug.
20. Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
21. Always turn off this appliance before connecting or disconnecting motorized nozzle.
22. Use only with motorized nozzle model SPB-224.

**CANISTER FEATURES**

**POWER CONTROL HANDLE**
- When lit, change vacuum bag or check for clog in hose.
- When lit, change HEPA filter (page 11).
- Light indicates when power nozzle is in use.
- Power Levels:
  - MAX 100%
  - HIGH 75%
  - MED 50%
  - LOW 25%
  - OFF 0%
- Increase power
- Decrease power

**HARDWOOD FLOOR BRUSH**
- For use on tile, hard wood, or linoleum floor.

**FLOOR BRUSH STORAGE**
- Insert the wand holder into the parking slot on bottom or backside of unit.

**MAIN ON / OFF BUTTON**
- Light indicates when power nozzle is in use.
- Power nozzle
  - ON - Canister power is on and power nozzle is off.
  - OFF - All power is off.

**CORD REWIND**

- One touch integrated wand
- On-board cleaning tools
- 3-in-1 multi-purpose tool
  - Insert end of wand into either end of tool for multiple cleaning functions.

**HOSE ADAPTER**
- Adapter button
  - When separating the hose from the body, press the adapter buttons to release the hose.
HOW TO USE POWER NOZZLE

OPERATION

1. Turning on the Power Nozzle
   The power nozzle can only be turned on if the canister is also turned on (canister on / off switch is located on the main body). The power nozzle on / off switch is located on the handle. Simply press the power nozzle on / off switch to engage the power nozzle.
   To achieve best cleaning results, slowly pass the power nozzle back and forth over the carpet or floor.

2. Using the Power Nozzle
   After turning on the canister and power nozzle, release the wand by pressing the left pedal on the back side of the power nozzle (see diagram 3).

3. Remove / Insert the Wand From The Power Nozzle
   Removing the wand from the power nozzle allows you, for example, to use cleaning tools for baseboard or ceiling cleaning.
   To remove the wand, simply press the wand back into the neck of the power nozzle. The wand will then “click” back into place.

4. Carpet Height Adjustment
   Your power nozzle has six different settings to clean a variety of carpet types and floor surfaces. To adjust the carpet height setting of the power nozzle, press the right pedal located on the back of the power nozzle (see diagram 6). Each press of this pedal will adjust the height to the next carpet height position.
   To determine which setting you are currently on, locate and look through the height indicator window on the top of the unit (see diagram 7).
   You will see one of the six settings as mentioned earlier and detailed below:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Intended Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. XHI</td>
<td>Very plush carpet</td>
</tr>
<tr>
<td>2. HI</td>
<td>Plush carpet</td>
</tr>
<tr>
<td>3. Auto</td>
<td>General carpet thickness or bare floors</td>
</tr>
<tr>
<td>4. MED</td>
<td>Medium pile carpet</td>
</tr>
<tr>
<td>5. LO</td>
<td>Low pile carpet</td>
</tr>
<tr>
<td>6. XLO</td>
<td>Indoor/outdoor carpet</td>
</tr>
</tbody>
</table>

   Carpet Height Notes: When using the power nozzle, start on the “auto” setting. If pushing the power nozzle forward feels sluggish or hard to push, then adjust to a higher setting (i.e. HI or XHI). If the power nozzle feels very easy to push, you may want to lower the power nozzle for more effective cleaning. The “Auto” setting is the recommended setting for hard floor surfaces (i.e. tile, vinyl, wood).

5. Warning Light
   Your power nozzle comes equipped with a circuit breaker safety system that protects it from a jammed power nozzle situation.
   Common items that cause jammed brushrolls include socks, excessive threads, corners of area rugs, etc. The warning indicator light on top of the unit (see diagram 8) will change from green to red should this condition occur.

   If the circuit breaker trips:
   a. Turn off the vacuum cleaner and power nozzle then unplug the power cord.
   b. Remove the object preventing the brushroll from turning.
   c. Locate the circuit breaker switch on the back of the power nozzle and press it to reset the breaker (see diagram 9).
   d. When the unit is turned back on, the warning light should be green and ready to go. If the breaker trips again, repeat steps a-c again to correct the problem. If this does not correct the problem, contact your authorized vacuum cleaner retailer for further assistance.

MAINTENANCE AND CARE

1. Removing the Brushroll
   IMPORTANT: Before performing any maintenance work on the power nozzle, always unplug the vacuum cleaner and disconnect the wand.
   Your brushroll may need to be removed at times, for example, to cut threads that have become tangled around the brushroll or to replace the belt (see “Replacing the Belt”).
   To remove the brushroll, turn the unit over and lift off the metal bottom plate by first unscrewing the two bottom plate screws located by the rear wheels (see diagram 10). Pull out the belt cover guard (see diagram 11) and pull the brushroll out.

   To reinstall the brushroll, reinsert the brushroll back into the unit (make sure the belt is attached properly). Next, insert the belt cover guard.
   Then, place the metal bottom plate back onto the unit (insert the front end of the bottom plate first). Re-rotate the two bottom plate screws and secure.
MAINTENANCE AND CARE

2. Replacing the Power Nozzle Belt
   IMPORTANT: Before performing any maintenance work on the power nozzle, always unplug the vacuum cleaner and disconnect the wand.

   To replace the power nozzle belt, you must first remove the brushroll (see "Removing the Brushroll"). Locate and discard broken belt.

   To install new belt, locate the power nozzle motor pulley and loop the belt around it (see diagram 12). Place the other end of the belt around the brushroll making sure the belt is seated in the "belt groove" of the brushroll (see diagram 13). Insert the brushroll back into the brushroll tray and place the belt guard back into position (see diagram 11). Place the metal bottom plate back onto the unit (insert the front end of the bottom plate first). Re-insert the two bottom plate screws and secure.

3. Replacing the Bulb
   IMPORTANT: Before performing any maintenance work on the power nozzle, always unplug the vacuum cleaner and disconnect the wand.

   Turn the power nozzle over and remove the bottom plate by first unscrewing the two bottom plate screws located by the rear wheels (see diagram 10). Locate and remove the two top cover screws (see diagram 14). Turn the power nozzle back over, push the power nozzle neck flat, and remove the top cover (see diagram 15). Simply pull the bulb out (no twisting) and reinsert a factory-authorized bulb. Place the top cover back on the unit, turn the machine over and re-insert the two top cover screws. Reinstall the bottom plate.

DIAGRAM 1 REAR VIEW OF POWER WAND AND NOZZLE ASSEMBLY

DIAGRAM 2 FRONT VIEW OF POWER WAND AND NOZZLE ASSEMBLY
**HOW TO USE CLEANING TOOLS**

- Open the tool cover lid to access tools.

**Tool cover lid button**

**Floor brush**
- Effective for hard surface cleaning (wood, tile, etc)

**Upholstery tool**
- Ideal for cleaning furniture

**Dusting brush**
- (slides off the end of the upholstery tool) for shelves, tables, etc

**Crevice**
- Designed to clean in tight spaces (i.e. between sofa cushions)

**REPLACING VACUUM BAG**

- Turn canister off, remove hose, and open the dust cover.

**Dust cover latch**

**Vacuum bag holder**

**Bag collar**

- Grab the bag collar and pull the vacuum bag out of the vacuum bag holder. Insert new bag.
- Do not re-use vacuum bag.

**NOTE:** The “change bag” light is located on the power handle and will light up when either the bag is full or when a clog is detected in the machine. If upon inspection the bag is not full, please inspect the hose or wand for a clog and remove.

**REPLACING THE FILTERS**

### Replacing the charcoal filter:
- Unplug canister and remove the hose.
- Open the dust cover and locate the charcoal filter behind the bag.
- Remove filter case and discard used filter.
- Insert new charcoal filter into filter case and re-insert case.
- Close the dust cover.

### Replacing the S-Class HEPA filter:
- Unplug canister and remove HEPA filter cover.
- Remove and discard used HEPA filter.
- Insert new S-Class HEPA filter.
- Press the “reset filter button” located next to the S-Class HEPA filter.
- Reinsert HEPA filter cover onto the machine.

**NOTE:** Change the S-Class HEPA filter when the “service filter” light is illuminated on the power handle. Genuine S-Class HEPA filters cannot be washed or re-used.
TROUBLESHOOTING GUIDE

Please check each item below if you have trouble with your vacuum.
Before checking, ensure that the vacuum is unplugged from the power supply.

SAFETY PRECAUTIONS

This vacuum cleaner should be used for normal, dry household dust and dirt.
The manufacturer cannot be held responsible for any damage caused by use or operation of the vacuum contrary to these instructions.
If the vacuum is wrongly operated for a purpose other than that for which it is intended, no liability can be accepted for any possible damage.

- Do not vacuum areas which contain moisture or water, flammable matter, needles, pins, razor blades, matches, cigarettes, etc., since they may damage the vacuum or vacuum bag.
- When rewinding the power cord, hold the plug before pressing the cord rewind button to prevent the cord from whipping.
- Do not pull the power cord out beyond the red mark.
- Make sure a vacuum bag, a charcoal filter and a HEPA filter are always inserted.
- This product is equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug fits into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact an electrician to replace the obsolete outlet. Do not defeat the safety purpose of the polarized plug.
