IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should always be followed, including the following:

READ ALL INSTRUCTIONS BEFORE USING THIS APPLIANCE

IMPORTANT: The manufacturer cannot accept responsibility for damage caused when the appliance is not used according to the instructions, or for uses other than those for which it was intended.

WARNING: To reduce the risk of fire, electric shock or injury:

• Do not leave appliance when plugged in. Unplug from outlet when not in use and before servicing.

• WARNING: ELECTRIC SHOCK COULD OCCUR IF USED OUTDOORS OR ON WET SURFACES.

• Do not allow to be used as a toy. Close attention is necessary when used by or near children.

• Use only as described in this manual. Use only manufacturer’s recommended attachments.

• Do not use with damaged cord or plug. If appliance is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, return it to your Authorized Retailer for service.

• Do not pull or carry by cord, use cord as a handle, close a door on the cord, or pull cord around sharp edges or corners. Do not run appliance over cord. Keep cord away from heated surfaces.

• Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.

• Hold plug when retracting the power cord to prevent the cord from whipping.

• Do not handle plug or appliance with wet hands.

• Do not put any object into openings. Do not use with any opening blocked; keep free of dust, lint, hair and anything that may reduce air flow.

• Keep hair, loose clothing, fingers and all parts of body away from openings and moving parts.

• Do not pick up anything that is burning or smoking, such as cigarettes, matches or hot ashes.

• Do not use without vacuum bag in place.

• Turn off all controls before unplugging.

• Use extra care when cleaning on stairs.

• Do not use to pick up flammable or combustible liquids such as gasoline or use in areas where they may be present.

• Do not attempt to service the unit while appliance is plugged in.

• Do not use vacuum to pick up water or any wet materials.

• This vacuum is intended for household use only.

SAVE THESE INSTRUCTIONS.
Power Cord, 2-Wire Polarized Cord
To reduce the risk of electric shock, this product is equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact a qualified electrician to replace the obsolete outlet. Do not defeat the safety purpose of the polarized plug.

State of California Proposition 65 Warnings:
WARNING: This product contains one or more chemicals known to the State of California to cause cancer.

WARNING: This product contains one or more chemicals known to the State of California to cause birth defects or other reproductive harm.
DESCRIPTION OF THE VACUUM

1. On/Off Switch
2. Motor Speed Control
3. Full Bag Indicator
4. Bag Compartment Latch
5. Tool Caddy
6. 2-n-1 Tool
7. Crevice Tool
8. Suction Relief Dial
9. Handle Release Button
10. Wand Extension Button
11. Telescopic Wand
12. Floor Turbo Nozzle
13. Floor It! Bare Floor Tool with Microfiber Pad
14. Wand and Floor Tool Storage (2)
15. Power Cord Catch
16. Carry Handle
17. Tools Adapter
Attaching the Hose to the Vacuum

**NOTE:** Do not plug in the vacuum until it is completely assembled.

Push the hose inlet into the canister body until it clicks into place. (Fig. 1)

To remove the hose from the canister body, press the buttons on the hose inlet and pull it away from the canister (Fig. 1).

Attaching the Wand to the Hose

Push the hose handle into the top of the wand until it clicks into place (Fig. 2).

Attaching the Tool Caddy to the Hose

Attach the tool caddy to the hose by lifting up on the tool clip and sliding the tool caddy down until it clicks into place. Attach any of the cleaning tools to the caddy (Fig. 3).
Motor Speed Control
Slide to increase or decrease the power of the motor (Fig. 1).

Carrying the Vacuum
To safely transport your vacuum, especially when carrying the vacuum up and down stairs, use the Carry Handle located at the top of the bag compartment (Fig. 2).

Power Cord Management
Pull the cord out of the vacuum to the desired length. Do not pull the cord out past the yellow safety tape.

Insert the cord into the cord catch to lock it into place (Fig. 3).

To retract the cord, remove it from the cord catch and tug on the cord until it retracts into the vacuum.

Storage
The tab on the end of the wand or the neck of the floor tool can be inserted into either groove on the back or on the bottom of the canister for easy storage (Fig. 4).
ATTACHMENT CLEANING

Cleaning Tools
Your vacuum is equipped with a 2-n-1 (dusting brush/upholstery) tool, crevice tool, Floor It! tool, and floor turbo nozzle.

Attach any of the cleaning tools to the end of the telescopic wand or the hose handle.

2-n-1 Tool
Convert from a dusting brush to an upholstery tool by inserting the hose handle or wand end into the indicated openings (Fig. 1).

Crevice Tool
Ideal for tight places like between seat cushions or corners (Fig. 2).

Floor It! Tool with Microfiber Pad
Cleans and polishes tile, hardwood and linoleum floors (Fig. 3).

Floor Turbo Nozzle
Cleans area rugs and low pile carpet. Suction relief slider adjusts the suction level (Fig. 4).
Adjusting the Suction Power for Tool Cleaning
Full suction power may be too strong for some cleaning situations. For example, reduced suction power would be appropriate for cleaning sheer curtains.

On the hose handle, locate the Suction Relief Dial and rotate it open. This reduces the suction power coming through the hose. Rotate the dial closed (Fig. 1) when finished to restore full suction power.

Wand Cleaning
Extend the wand by pushing the wand extension button and pushing the wand outward to the desired length (Fig. 2).

Disconnect the wand from the hose handle by pressing the Handle Release Button (Fig. 3).

Tools Adapter
Attach the adapter to the end of the wand to use other cleaning tools not included with this vacuum (Fig. 4).
When to Change the Vacuum Bag
The Full Bag Indicator changes to red to show when the bag is full or when there is a clog in the vacuum (Fig. 1).

The indicator could also turn red when vacuuming fine powders such as flour or drywall dust. These materials can quickly block the bag pores, significantly reducing airflow before the bag is actually full. The vacuum bag should still be changed.

The indicator may also turn red during attachment cleaning. If the indicator changes to green when attachments are no longer in use, the vacuum bag does not need to be changed.

NOTE: The vacuum bags are disposable and should only be used once. Do not attempt to reuse the bag, as suction and filtration performance will be greatly reduced.

Replacing the Vacuum Bag
Change the vacuum bag when the full bag indicator changes from green to red or when the suction power is weak.

• Open the bag compartment lid (Fig. 2).

• Pull the tab on the bag collar, which closes the bag while removing it from the bag holder.

• Remove and discard the used bag.

• Slide a new bag into the bag holder until it clicks into place.

• Close the bag compartment lid.
When to Change the Filters
At a minimum, it’s recommended to replace the HEPA media and secondary filters after using 12 vacuum bags.

If someone in your household is sensitive to airborne allergens, it is recommended to change the filter set after every six vacuum bags.

Replacing the HEPA Media Filter
• Open the bag compartment lid and locate the filter behind the vacuum bag. For better access to the HEPA media filter, remove the bag.

• Grasp the tab with two fingers and pull the filter out toward you. Replace with a new filter by sliding the filter in and pushing down on the top of the tab until it clicks into place (Fig. 1).

NOTE: The HEPA media filter cannot be washed and reused.

Replacing the Secondary Filter
• Open the bag compartment lid and locate the filter behind the vacuum bag. For better access to the secondary filter, remove the bag.

• Pull the filter holder up (Fig. 2).

• Remove the used filter and replace it with a new filter.

• Slide the filter holder back into place and replace the bag.
MAINTNANCE AND CARE

Power Cord Care

- If the cord or plug has any apparent damage, refrain from using the vacuum. Please visit an Authorized Simplicity Vacuum Retailer for a new cord or plug.

- When the vacuum is in use, hold the cord to keep from running over it.

- Avoid obstructions and do not pull the cord around sharp edges or corners.

- Always keep the cord away from heated surfaces and never close doors on it as this may cause damage to the wiring.

- To unplug, always grasp the plug, not the cord.

Annual Checkup

To keep your vacuum in peak operating condition, it is recommended you bring your vacuum to an Authorized Simplicity Vacuum Retailer for an annual checkup. The retailer will conduct a comprehensive examination to ensure your vacuum is in top operating condition.
If you have trouble with your vacuum, please check each item below. Unplug the vacuum from the power supply before servicing.

Key Replacement Parts
- Floor It! Bare Floor Tool Microfiber Pad 3 Pack: HFIP-3
- Genuine HEPA Media Vacuum Bags: SCH-6
- Genuine Filter Sets: SF19 (HEPA media and charcoal)
  SF19G (HEPA media and granulated charcoal)
WARRANTY

What is Covered:
This warranty covers any defects in material and workmanship in your new Simplicity vacuum and applies exclusively to the original purchaser.

How Long Coverage Lasts:
Warranty coverage for the Simplicity Wonder straight suction canister lasts three years. Household models used commercially are only warranted for 90 days.

What is Not Covered:
• Damage to the vacuum which occurs from neglect, abuse, alterations, accident, misuse or improper maintenance.
• Normal replacement items: filters, disposable bags and microfiber pads.

What Simplicity Vacuums Will Do:
This warranty provides, at no cost to you, all labor and parts to place this vacuum in correct operating condition during the warranted period.

How to Get Service:
Warranty service can only be obtained by presenting the vacuum to an Authorized Simplicity Retailer. A proof-of-purchase and product serial number will be required before service is rendered. To locate your nearest Simplicity Retailer, please call 1-888-9-SIMPLY or visit the Simplicity website at SimplicityVac.com.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ANY AND ALL OTHER WARRANTIES WHETHER WRITTEN, ORAL, EXPRESSED OR IMPLIED, (INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE). THIS WARRANTY DISCLAIMS LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

How State Law Applies:
This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

For Best Performance

• Keep your vacuum clean and in good operating condition.

• Change the vacuum bag once a month or when the full bag indicator turns red to maximize cleaning performance.

• Always use genuine Simplicity vacuum bags and replacement parts. Use of other products may result in poor cleaning performance, potential vacuum cleaner damage, and may void vacuum warranty. Genuine products are designed for maximum cleaning performance.

• Have your vacuum checked annually by your Authorized Simplicity Vacuum Retailer.

• Store your vacuum carefully in a dry area.

• For optimum cleaning performance and safety, follow your owner’s manual instructions.
